

Are you ready to take the pulse of your company: where do you fit in the landscape of your industry, your competition and the value chain?

SUSTAINABILITY ASSESSMENTS & CERTIFICATIONS

We can help you identify and inventory what you have in place **and** what you need to develop or enhance prior to engaging in assessments or certification processes.

Our “impact advisors” guide companies in how to strategically assess, manage, and communicate their sustainable practices – aka ESG – environmental, social and governance performance.

What makes The Fehlig Group different is how we become a partner, mentor and coach to provide guidance in ways that leverage and respect your capabilities and bandwidth. Serving clients ranging from multinational corporations to small, family-owned businesses, The Fehlig Group meets companies where they are in their current understanding and practice of ESG and sustainability.

Let us help you prepare for the questions being asked, have your documentation and measurements ready, respond effectively and get higher scores.
